

Y & S Design London Office Location

Y & S Design has announced the location of their company headquarters in the UK. Historic Bishopsgate will be the hub of operations. The area's long history combined with today's modern infrastructure is the perfect representation of a company that embraces the full gamut of [interior design](#) styles.

99 Bishopsgate is an iconic building at the heart of London's financial district. One of the first towers to grace the city skyline, its spectacular glass façade and prominent position makes it a stunning landmark.

Bishops Gate was once an important entry and exit point for travellers to and from London, and to mark this, a mitre is now set into the wall where the gate once stood.

Excellent road links provide easy access to the area, with Bishopsgate lying close to the A10. Rail links include Liverpool Street station, in addition to Aldgate and Moorgate underground stations.
